

Climate Action Policy for Chirchik State Pedagogical University

1. Commitment to Sustainability

Chirchik State Pedagogical University (CSPU) acknowledges the critical need to combat climate change and is committed to embedding sustainability across its operations, academic programs, and campus life. The university embraces environmental responsibility as a core institutional value.

2. Carbon Neutrality and Reduction Targets

CSPU sets a goal to achieve carbon neutrality by 2050. To reach this target, the university will work to reduce its carbon emissions by 90% from the 2025 baseline through strategic planning and implementation of emission reduction measures.

3. Energy Conservation and Efficiency

The university will lead energy-saving initiatives by incorporating renewable energy sources, installing energy-efficient technologies, and optimizing energy consumption across all campus buildings and facilities.

4. Sustainable Transportation

CSPU will promote eco-friendly transportation among students, faculty, and staff. This includes encouraging the use of public transit, bicycles, and carpooling, and enhancing campus infrastructure to support sustainable mobility.

5. Waste Reduction and Recycling

To minimize environmental impact, the university will expand waste reduction programs and campus-wide recycling. Actions include promoting composting, reducing single-use plastics, and ensuring accessible recycling stations throughout academic and residential facilities.

6. Sustainable Procurement

CSPU is committed to responsible procurement, giving priority to products and services with minimal environmental impact. The university will work with vendors and suppliers that follow ethical, sustainable practices.

7. Curriculum Integration and Research

The university will integrate sustainability concepts and climate-related issues across all academic disciplines. Research focusing on climate change mitigation,

resilience, and sustainable development will be actively encouraged and supported.

8. Campus Engagement and Awareness

CSPU will nurture a culture of environmental awareness by organizing sustainability campaigns, training sessions, student-led green initiatives, and events that encourage eco-conscious behavior among the university community.

9. Monitoring and Reporting

A robust monitoring and evaluation system will be established to track the university's sustainability efforts. Regular reports will be shared with stakeholders to ensure transparency and accountability in achieving climate action goals.

10. Collaboration and Partnerships

CSPU will engage in strategic partnerships with local governments, NGOs, international organizations, and academic institutions to strengthen its climate initiatives and contribute meaningfully to global sustainability movements.

This policy will be reviewed regularly and updated in accordance with evolving scientific knowledge, national priorities, and global best practices in climate action and sustainable development.
